

Welcome to **Mobile App** **Development**

**Learn React Native from Zero
to Advanced Features &
Publishing Apps**

About Me

7 years in software engineering (React Native & React.js)

Quick facts:

- Built 35+ Enterprise Apps for Android & iOS
- 4 years dedicated time fully to React Native
- Cofounder @ Deegeehub mobile app builder

What we will build

Features covered in 3 apps

- ❏ React Native CLI
- ❏ REST APIs
- ❏ React Hooks
- ❏ Google Maps
- ❏ Firebase (serverless)
- ❏ Search & Filtering
- ❏ User Authentication
- ❏ Social Share
- ❏ React Context
- ❏ Redux
- ❏ Momentjs
- ❏ Figma
- ❏ Deploying to Google Play
- ❏ Deploying to App Store

Why to choose React Native

01

Cross-platform

Supports Android, iOS and even web

02

Uses Javascript

Javascript is the most popular language

03

Active Community

A lot of support & available packages

04

Feels like Native

Relies on many native modules instead of webviews
